GT Converter2 Version3
Operating Manual for GT Works3

-SW1DND-GTWK3-E

SAFETY PRECAUTIONS

(Be sure to read these instructions before using this product.)

Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the product correctly.

The precautions given in this manual are concerned with this product.

In this manual, the safety precautions are ranked as "WARNING" and "CAUTION".

⚠ WARNING	Indicates that incorrect handling may cause hazardous conditions, resulting in death or severe injury.
⚠ CAUTION	CAUTION Indicates that incorrect handling may cause hazardous conditions, resulting in minor or moderate injury or property damage.

Note that the ⚠ caution level may lead to a serious accident according to the circumstances.

Make sure to observe both warnings and cautions to ensure personal safety.

Please save this manual to make it accessible when required and always forward it to the end user.

[Precaution for Conversion]

⚠CAUTION

● All project data conversion for the GOT1000 or GOT-A900 series using GT Converter2 shall not be guaranteed.
Before downloading converted project data to the GOT, be sure to check the settings with GT Designer3 and correct them if necessary.
Failure to do so can lead to malfunction.

CAUTIONS FOR USING THIS SOFTWARE

Required PC memory

The processing may be terminated by Windows® on a personal computer of which main memory capacity is less than 64M bytes. Make sure to secure the capacity of 64 M bytes or more.

Free capacity of hard disk (virtual memory)

At least 50M bytes of free capacity of virtual memory should be secured within hard disk to run this software.
The processing may be terminated by Windows®, if 50M bytes or more of free space cannot be secured within hard disk while running GT Designer.
Secure enough free capacity of virtual memory within hard disk space in order to run the software.
When enough free capacity cannot be secured, make sure to save projects frequently.

Error messages displayed while starting and editing

"Insufficient memory."
If the above message appears, close other running application software or reboot Windows® in order to secure at least 50M bytes of free hard disk space.

OS setting

Set the font size as "Small Font" when setting OS (Windows®) screen.
The GT Designer3 dialog box cannot be displayed correctly if the font size is set as "Large font".

CONTENTS

INTRODUCTION

Thank you for choosing Mitsubishi Electric Graphic Operation Terminal (GOT).

Before using the product, read this manual carefully and make sure you understand the functions and performance of the GOT for correct use.

Manuals for GT Works3

The electronic manuals related to this product are installed together with the screen design software.

If you need the printed manuals, consult your local sales office.

Manuals for GT Designer3 (GOT2000)

Point

e-Manual

e-Manual refers to the Mitsubishi Electric FA electronic book manuals that can be browsed using a dedicated tool.

e-Manual has the following features:

• Required information can be cross-searched in multiple manuals.

• Other manuals can be accessed from the links in the manual.

• Hardware specifications of each part can be found from the product figures.

• Pages that users often browse can be bookmarked.

1 OVERVIEW

This manual explains the specifications and operation methods of GT Converter2.

Point

• Installation method of GT Converter2

For the installation method of GT Converter2, refer to the following manuals.

📖GT Works3 Installation Procedure Manual

1.1 Features

GT Converter2 converts projects created with existing screen editor software into Designer3 or GTD2 Classic-compatible projects.

Supporting SCHNEIDER EJH's screen editor software data

☞Page 23 Compatible File Formats

Projects created with SCHNEIDER EJH's GP-PRO/PBⅢ series screen editor software can be converted into GT Designer3 or GT Designer2 Classic-compatible projects (GOT2000 format, GOT1000 format, or GOT-A900 format).

GP-PRO/PBⅢ series   GT Converter2   GT Designer3

The GOT2000, GOT1000, or GOT-A900 series can be selected as a GOT type.

When the GOT2000 series is selected, a GOT type is GT27.

When the GOT1000 series is selected, a GOT type can be selected from GT16 or GT15.

Supporting GOT800 series screen editor software data

☞Page 23 Compatible File Formats

Projects created with the GOT800 series screen editor software SW3NIW-A8GOTP can be converted into GT Designer3 or GT Designer2 Classic-compatible projects (GOT2000 format, GOT1000 format, or GOT-A900 format).
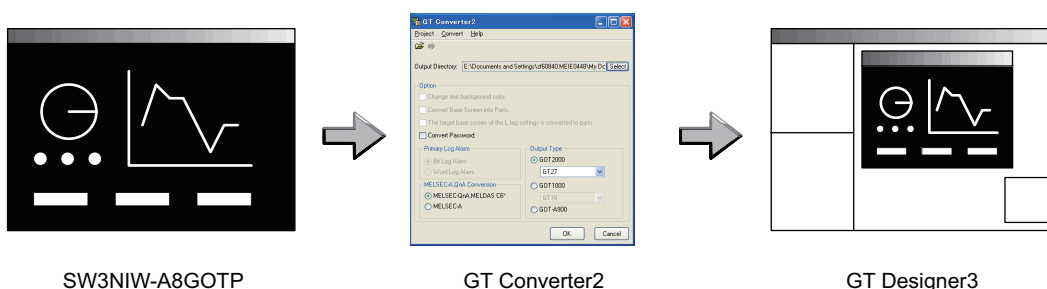

SW3NIW-A8GOTP   GT Converter2   GT Designer3

The GOT2000, GOT1000, or GOT-A900 series can be selected as a GOT type.

When the GOT2000 series is selected, a GOT type is GT27.

When the GOT1000 series is selected, a GOT type can be selected from GT16 or GT15.

Outputting conversion logs

☞ Page 34 Checking Conversion Result

The conversion logs (conversion results) can be displayed on the screen and saved as a text file.

If a conversion failure occurs, the cause of the failure can be checked on the conversion logs.
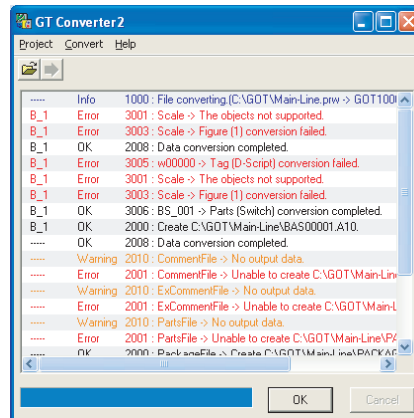

2 OPERATING ENVIRONMENT

Item	Description
Personal computer	PC/AT compatible personal computer that Windows® runs on
Operating system[*1][*2]	Microsoft® Windows® 10 Enterprise (English version)[*4][*6][*7][*8] Microsoft® Windows® 10 Pro (English version)[*4][*6][*7][*8] Microsoft® Windows® 10 Home (English version)[*4][*6][*7] Microsoft® Windows® 8.1 Enterprise (English version)[*4][*6][*7][*8] Microsoft® Windows® 8.1 Pro (English version)[*4][*6][*7][*8] Microsoft® Windows® 8.1 (English version)[*4][*6][*7] Microsoft® Windows® 8 Enterprise (English version)[*4][*6][*7][*8] Microsoft® Windows® 8 Pro (English version)[*4][*6][*7][*8] Microsoft® Windows® 8 (English version)[*4][*6][*7] Microsoft® Windows® 7 Ultimate (English version)[*4][*5][*6] Microsoft® Windows® 7 Enterprise (English version)[*4][*5][*6] Microsoft® Windows® 7 Professional (English version)[*4][*5][*6] Microsoft® Windows® 7 Home Premium (English version)[*4][*6] Microsoft® Windows® 7 Starter (English version)[*3]
CPU	1GHz or more
Memory	32-bit OSs: 1GB or more recommended 64-bit OSs: 2GB or more recommended
Display	Resolution SVGA(800 × 600 dots) or more
Hard disk space	For installation: 20MB or more
Display color	High Color (16 bits) or more
Others	The mouse, keyboard, printer, and DVD-ROM drive must be compatible with the above OS.

*1 When installing GT Converter2, the administrator authority is required.
*2 The following functions are not supported.
 ◇Activating the application with Windows® compatibility mode
 ◇Fast user switching
 ◇Change your desktop themes (fonts)
 ◇Remote desktop
 ◇Setting the size other than [Smaller - 100%] for the characters and images on the screen
*3 Only the 32-bit OS is available.
*4 The 32-bit OS and the 64-bit OS are available.
*5 Windows XP Mode is not supported.
*6 Windows Touch and Touch are not supported.
*7 Modern UI style is not supported.
*8 Hyper-V is not supported.

MEMO

2 OPERATING ENVIRONMENT

3 SPECIFICATIONS

3.1 Compatible File Formats

This section explains GT Converter2 compatible file formats before and after conversion.

Conversion source file format

| conversion source | GT Converter2 | GT Designer3 |

SW3NIW-A8GOTP/
GP-PRO/PBⅢ series

GT Converter2

GT Designer3
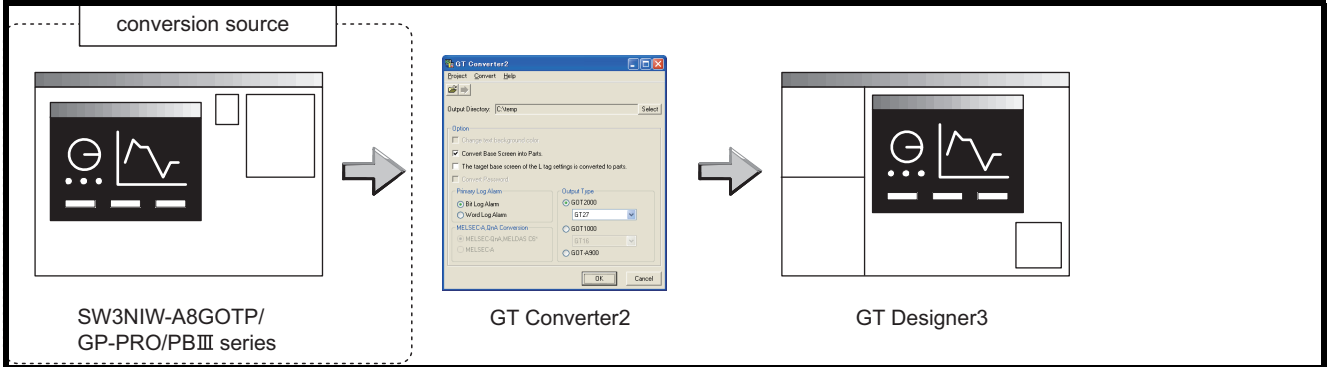

■SCHNEIDER EJH's screen editor software

The following can be specified as conversion source file formats.

Screen editor software	File format
GP-PRO/PBⅢ for Windows95 GP-PRO/PBⅢ for Windows GP-PRO/PBⅢ C-Package01 GP-PRO/PBⅢ C-Package02 GP-PRO/PBⅢ C-Package03	ProPB/Win project format (*.prw)
GP-PRO/PBⅢ (DOS Version)	ProPB/DOS project format (*.pro)

Point

• Precautions for converting projects created with SCHNEIDER EJH's screen editor software

If a project created with SCHNEIDER EJH's GP-PRO/PBⅢ series screen editor software is not correctly converted, reopen and save the project with the software, and then convert it. The conversion may be successful.

For details on SCHNEIDER EJH's GP-PRO/PBⅢ series screen editor software, refer to the following.
📖SCHNEIDER EJH's GP-PRO/PBⅢ series manual

■GOT800 Series screen editor software

The following can be specified as a conversion source file format.

Screen editor software	File format
SW3NIW-A8GOTP	GOT800 Format (a8gotp.got)

Point

• To Reuse Project Data Created for A64GOT or A77GOT

Using SW3NIW-A8GOTP, convert the project data for A64GOT or A77GOT into GOT800 file format.
The project data in GOT800 format can be converted into GT Designer2 project data using GT Converter2.
Refer to the following manual for the details.
📖SW3NIW-A8GOTP Graphic Settings Software Package Operating Manual (Monitor Screen Creation Manual) (IB-66793) (Section 2.5 Using Previously Created GOT Data)

File format after conversion

after conversion

SW3NIW-A8GOTP/
GP-PRO/PBⅢ series

GT Converter2
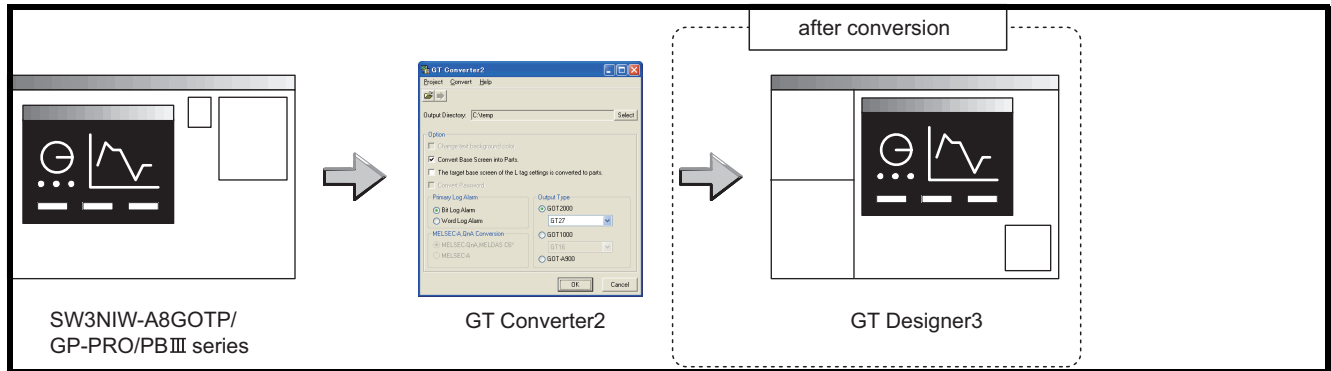

GT Designer3

The following can be specified for the file formats after conversion.

Manufacturer	Screen editor software	File format
Mitsubishi Electric Corporation	GT Designer3	GOT2000 Format (*.GTCNV) GOT1000 Format (*.g1) GOT-A900 Format (A9GOTP.GOT)

Point

• Data Size of Converted File

When checking the data size of the file after conversion, save the project data on GT Designer3 once, and then re-open the saved project data.

The data size may not be displayed properly if this is not performed.

4 GT CONVERTER2 SCREEN LAYOUT

4.1 Screen Layout and Basic Operations

Screen layout

The screen is laid out as shown below.

Title bar

Toolbar
☞

Menu bar
☞

Dropdown menu
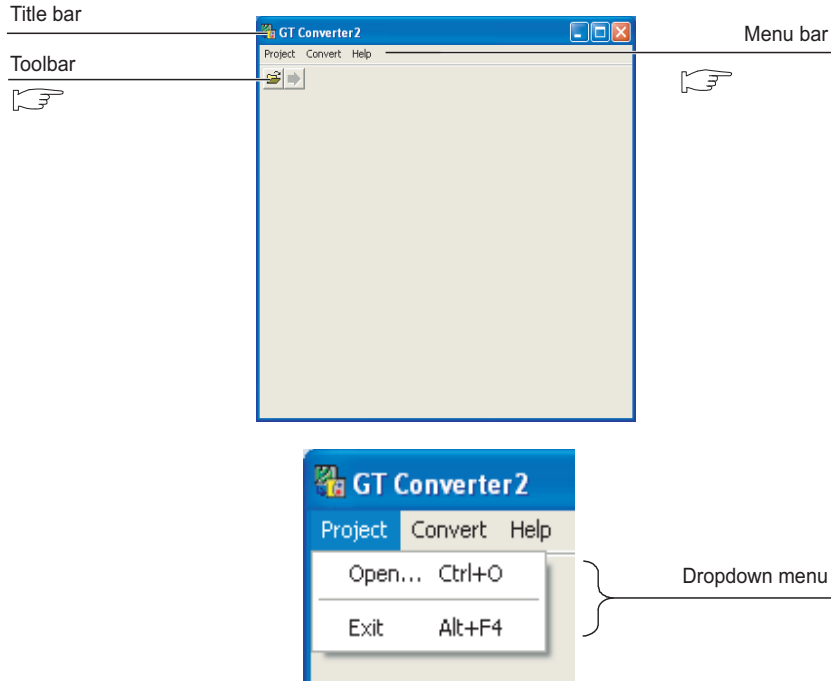

Basic operations

Basic operations are explained here.

1. Check box

To execute an item, click □ to put the ✔ mark.

(1) Check box
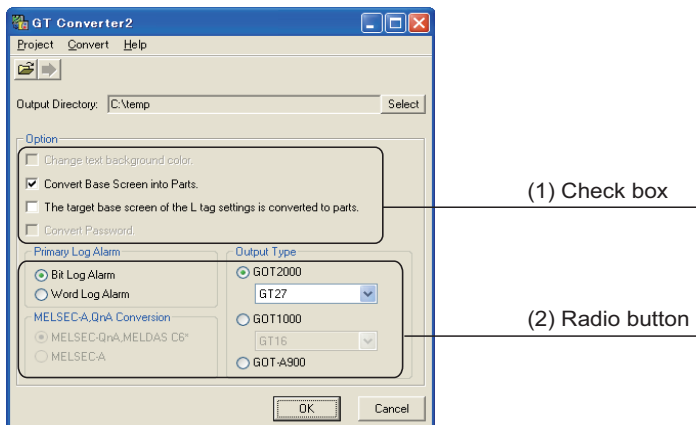

(2) Radio button

2. Radio button

Click ○ for the item to be selected.

4

4.2 Menu Bar

The following commands are provided on the menu bar.

Project

The Project menu contains commands to open project data and exit GT Converter2.
☞Page 29 GT CONVERTER2 OPERATION METHODS

Project	
Open...	Ctrl+O
Exit	Alt+F4
Convert

The Convert menu contains a command to display the conversion setting screen.
☞Page 29 GT CONVERTER2 OPERATION METHODS

Convert	
Start	Ctrl+S
Help

The Help menu contains commands to view PDF files relevant to GT Converter2 and check the software version.
☞Page 27 How to use Help

Help
Index(GOT900)
Index(GOT1000)
About GT Converter2...
Connection to MITSUBISHI ELECTRIC FA Global Website...
4.3 Toolbar

The following toolbar are provided.

Name		Content
	Open	Opens a conversion source file.
	Start	Used to make conversion settings and perform conversion.

4.4 How to use Help

Help is used for referring to the GT Designer3-relevant manual (PDF format) and confirming the software version.

> **Point**
>
> • Before viewing PDF format manual
>
> To view the PDF manual, GT Manual and Adobe® Reader® is required to be installed.

Operation method

1. Click on each menu item under [Help].

Item	Description
[Index (GOT 1000)], [Index (GOT900)]	This item is used for viewing a PDF manual.
[About GT Converter2...]	This item is used for confirming the GT Converter2 version.
[Connection to MITSUBISHI ELECTRIC FA Global Website...]	Connects to the MITSUBISHI ELECTRIC FA Global Website.

PDF manual viewing procedure(When [Index (GOT1000)] / [Index (GOT900)] is selected.)

1. After operation in [Help] - [Index(GOT900)]/[Index(GOT1000)] , the screen shown below is displayed. Click the manual you want to view.

Click
*The above is user for explanation only and differs from the actual page.

2. The selected manual is displayed.

(For details of the Adobe® Reader® operation method, refer to the help of Adobe® Reader®.)

Switches the display to the first page of the selected item

Returns to INDEX MENU.
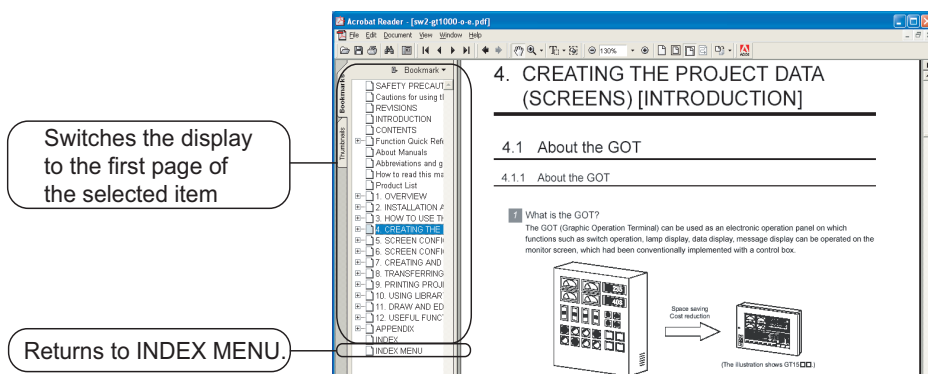

*The above is user for explanation only and differs from the actual page.

GT converter2 version check procedure (When selecting [About GT Converter2...])

1. After operation in [Help] - [About GT Converter2...], the Version Information screen is displayed.

(Example: When the version is 3.02C)

Item	Description
GT Converter2	The version of the GT Converter2 is displayed.
Name	The name entered at GT Converter2 installation is displayed.
Company	The company name entered at GT Converter2 installation is displayed.
[OK]	Closes the version information screen.

5 GT CONVERTER2 OPERATION METHODS

5.1 Operating Procedures

The GT Converter2 operating procedures are shown below.

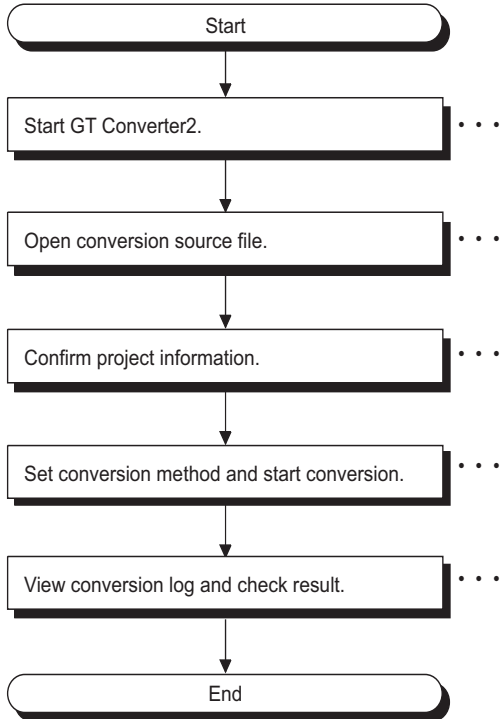

```

5

Point

• To Reuse Project Data Created for A64GOT or A77GOT

Using SW3NIW-A8GOTP, convert the project data for A64GOT or A77GOT into GOT800 file format.

The project data in GOT800 format can be converted into GT Designer2 project data using GT Converter2.

Refer to the following manual for the details.

☞ SW3NIW-A8GOTP Graphic Settings Software Package Operating Manual (Monitor Screen Creation Manual) (IB-66793) (Section 2.5 Using Previously Created GOT Data)

5.2 Opening Conversion Source File

Open a conversion source file.

1. Either of the following operations displays a dialog box.

• Click 📂 (Open).

• Select [Project] → [Open] from the menu.

2. Make the following settings and click the [Open] button to open the conversion source file.
Item	Description
Lock in	Select the location where the conversion source file is saved.
File name	Enter the conversion source file name.

3. Opening the conversion source file displays the project information screen.

The project information obtained from the conversion source file is displayed on the project information screen.

Unknown is shown for items for which project information could not be obtained.

Conversion applicability

Item	Description
File name	Displays the project file name.
Type	Displays the type of the screen editing software used to create the conversion source file. ProPB3 for Windows Project: Displayed when the conversion source file was created by any of the following software. ◇GP-PRO/PBⅢ for Windows95 ◇GP-PRO/PBⅢ for Windows ◇GP-PRO/PBⅢ C-Package01 ◇GP-PRO/PBⅢ C-Package02 ◇GP-PRO/PBⅢ C-Package03 ProPB3 for DOS Project: Displayed when the conversion source file was created by GP-PRO/PB Ⅲ (DOS version). A8GOTP Project: Displayed when the conversion source file was created by SW3NIW-A8GOTP.
Title	Displays the comment (GP-PRO/PB Ⅲ series) or project title (SW3NIW-A8GOTP) set for the project.
PLC	Displays the PLC type set for the project.
Terminal	Displays the GP type (GP-PRO/PB Ⅲ series) or GOT type (SW3NIW-A8GOTP) set for the project.
Conversion applicability	The conversion source file can be converted when "Convertible" is displayed. Conversion is not allowed when "Unconvertible" [*1] is displayed.

*1 Unconvertible is displayed in either of the following cases:

◇When "Unknown" appears in "Type"

Check if the conversion source file is faulty or not with the screen editor software.

◇When the PLC type displayed in "PLC" does not support conversion

5.3 Conversion

Select a folder in the output directory, make the conversion method settings, and then start conversion.

1. Performing either of the following operations with the conversion source file open displays the conversion settings screen.

- Click (Start Conversion)
- Select [Convert] → [Start] from the menu.

2. On the conversion settings screen, select the folder in the output directory and set the conversion methods. Click the [OK] button to start the conversion. The conversion logs showing the conversion results are displayed.

Clicking the [Cancel] button during conversion will stop the conversion.

- Output Directory Setting

- Conversion Method
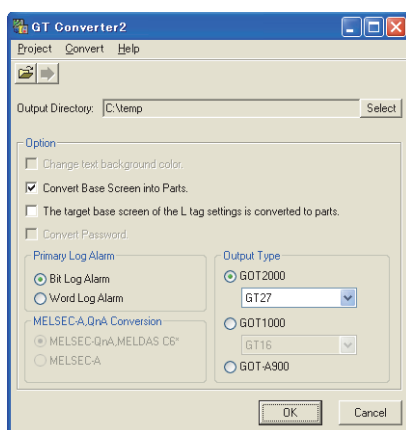

Converted File Types

The file type of the converted files varies depending on the conversion format settings

Conversion format	File name
GOT2000	The following 2 types of files are output after conversion. ◇"<filename>.GTCNV" ◇"Script\Sc<Sequence number>.txt" (Output into "Script" folder) The name of the source project file is entered in <filename>. Example:"AssemblyLine.prw" -- (Conversion) → "AssemblyLine.g1" A number greater than 1 is placed in <Sequence number>.
GOT1000	The following 3 types of files are output after conversion. ◇"<filename>.g1" ◇"<filename>.g1d" ◇"Script\Sc<Sequence number>.txt" (Output into "Script" folder) The name of the source project file is entered in <filename>. Example:"AssemblyLine.prw" -- (Conversion) → "AssemblyLine.g1" A number greater than 1 is placed in <Sequence number>.

Conversion format	File name
GOT-A900	After conversion, the following 8 types of files are output. ◇"A9GOTP.GOT" ◇"PARTS00.A9" ◇"BAS00001.A9" to "BAS08999.A9" ◇"WIN00001.A9" to "WIN08999.A9" ◇"COMMEN00.A9" ◇"PACKAGE.A9" ◇"GOTWAV00.A9" ◇"Script\Sc<Sequence number>.txt" (Output into "Script" folder) A number greater than 1 is placed in <Sequence number>. Example: "AssemblyLine.prw" -- (Conversion) → "A9GOTP.GOT"

Handling of Converted Files

The above set of files is all required when opening a converted file with GT Designer 2.

When handling the files (copy/move/delete), perform the operation on all of these files together.

Output directory setting

Make the output directory setting on the conversion settings screen.

After conversion, the converted file and the conversion log are saved in the targeted output file.

1. Clicking on the [Select] button provided for "Output Directory:" on the conversion settings screen displays the Browse for Folder screen.

2. Select a folder on the Browse for Folder screen and click the [OK] button.
Conversion option settings

Set conversion methods on the conversion settings screen.

1. Make the following settings.
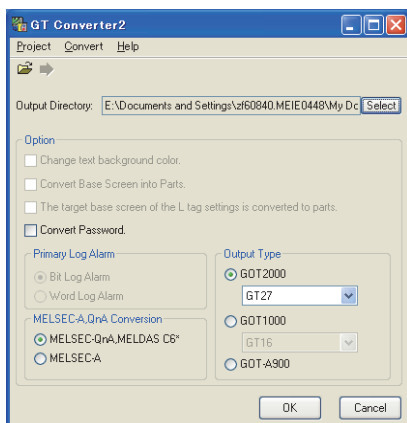

(When converting the project data for GOT800 series.)
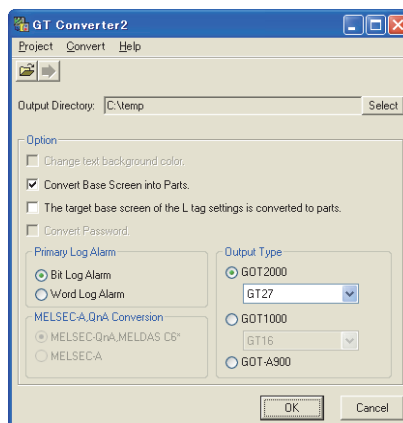

(When converting the project data for GP-PRO/PB III series.)

○: Applicable, ×: Not applicable

Item	Description	Source file format		
		ProPB/Win	ProPB/DOS	GOT800
Change text background color	When checked, the rectangle filled with a background color is placed behind the character string. Applicable only when "GOT-A900" format is selected for "Output Type". When you mark this checkbox, this square shape is inserted underneath. For GOT1000 series, a background color can be converted regardless of this setting item.	○	○	×
Convert Base Screen into Parts.	When checked, the base screen in the conversion source file is converted into a base screen and parts. In this case, only the graphic data placed on the base screen of the conversion source file are converted into parts. When not checked, it is converted into the base screen only.	○	×	×
The target base screen of the L tag settings is converted to parts.	When converting the L tag into parts display, set the part type. When checked, it is set to parts. When not checked, it is set to the base screen. This option setting is available when "Convert Base Screen into Parts." shown above is check-marked.	○	×	×
Convert the password.	When checked, the password for conversion source file is converted into the password for [Data Transmission/Utility].	×	×	○
Primary Log Alarm	Select the log alarm to be converted. Log alarm that is not selected is not converted.	○	○	×
MELSEC-A, QnA Conversion	When MELSEC-A, MELSEC-QnA, or MELSEC-Q is set for the conversion source project, this item can be selected. The conversion source file is converted into the selected PLC type.	×	×	○
Output type	When converting it into a GOT2000-format file (*.GTCNV), select GOT2000 type. When converting it into "GOT1000 Binary Files (*.G1)", select GOT1000 type. GOT1000??????????GT16/GT15????????? When converting it into "GT Designer Files (A9GOTP.GOT)", select GOT-A900 type.	○	○	○

5

5.4 Checking Conversion Result

Referring to the conversion logs, check the conversion results.

☞ Page 36 Conversion log list

The conversion logs are displayed on the screen at the time of conversion and saved in a text file.
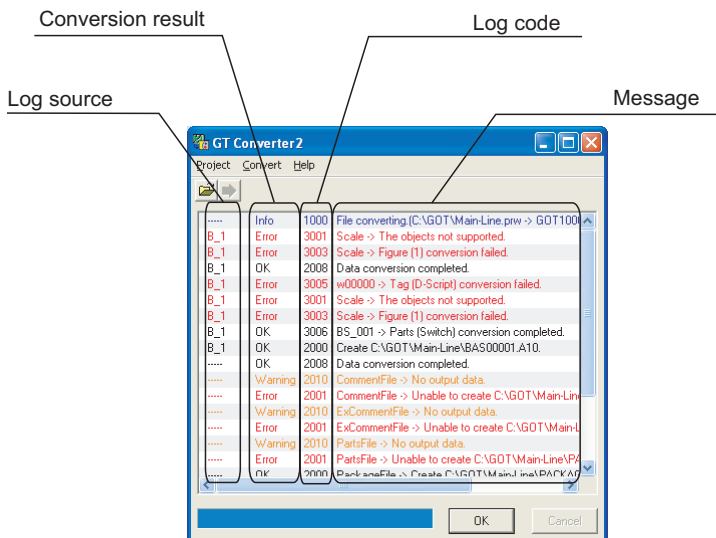

Item	Description
Log source	Displays the conversion source. ☞ Page 34 Log source list
Conversion result	OK: Indicates conversion has been done properly. Warning: Indicates there is a warning. Error: Indicate failure in conversion. Info: Indicates information other than the above.
Log code	Displays the log code.
Message	Displays the conversion source objects and messages. ☞ Page 35 Conversion source object list ☞ Page 36 Conversion log list Conversion source objects are displayed only when a diagram, tag, or part has been converted.
[OK] button	Returns it to the project data screen. ☞ Page 30 Opening Conversion Source File
[Cancel] button	Stops current conversion.

Point

• The Conversion Log Text File

Do not open the conversion log text file during conversion.

If it is open, logs cannot be saved in the text file.

• The folder in which conversion logs are saved and the file name

The conversion logs are saved into the same file specified in the output directory.

☞ Page 32 Output directory setting

The conversion logs file name is almost the same as the conversion source file name except that the extension is changed to ".txt".

Example: "AssemblyLine.prw" -- (Conversion) → "AssemblyLine.txt"

Log source list

The log source list is shown below.

Display	Conversion source
B_<Number>	Base Screen
U_<Number>	Window Screen
K_<Number>	Keyboard Screen

Display	Conversion source
T_<Number>	Line Graph Screen
I_<Number>	Image Screen
X_<Number>	Text Screen
O_<Number>	Sound
A_<Number>	Alarm Summary
Q_<Number>	Log Alarm
W_<Number>	Text Table
F_<Number>	Filing Data
-----	Others

Conversion source object list

The conversion source object list is shown below.

Display	Conversion source
Line, poly-line, rectangle, circle, oval, pie, fill, polygon, tick mark, string, dot, bitmap	Graphic types are displayed when figures have been converted.
Other than the above	Tag IDs or part IDs which are the same as those displayed on the GP-PRO/PB Ⅲ series' editing screen are displayed.

Conversion log list

The following table lists conversion logs and corresponding corrective actions.

Log code	Message	Conversion result	Corrective action
1000	File converting.	Info	---
1001	Conversion completed.	Info	---
1002	Conversion Interrupted.	Error	Do not press the [Cancel] button during conversion.
1003	Conversion failed.	Error	Correct the error occurred before this error.
1004	Error(<Exception code>).	Error	After the conversion, modify the error screen with GT Designer 2.
1005	G1 file created.	OK	---
1006	G1 file creation error.	Error	Perform the following before conversion. ◇Exit the other running applications. ◇Check if you are logged in as the user with operating system administrator privileges. ◇Change the output target. ◇Restart Microsoft® Windows®.
1007	File reading error.	Error	Perform the following before conversion. ◇Exit the other running applications. ◇Check if you are logged in as the user with operating system administrator privileges. ◇Change the output target. ◇Restart Microsoft® Windows®.
1008	Failed to create temporary directory.	Error	Perform the following before conversion. ◇Restart GT Converter2. ◇Exit the other running applications. ◇Check if you are logged in as the user with operating system administrator privileges. ◇Change the output target. ◇Restart Microsoft® Windows®.
1009	GTCNV file created.	OK	---
1010	GTCNV file creation error.	Error	Perform the following before conversion. ◇Exit the other running applications. ◇Check if you are logged in as the user with operating system administrator privileges. ◇Change the output target. ◇Restart Microsoft® Windows®.
2000	Create "<path>".	OK	---
2001	Unable to create "<path>".	Error	Correct the error occurred before this error.
2002	Device conversion error.	Warning	After the conversion, set the device of the error object again with GT Designer3.
2003	LS Area conversion error.	Warning	After the conversion, set the device of the error object again with GT Designer3.
2004	Maximum data number exceeded.	Error	Correct the error data with the screen editor software before conversion.
2005	Data code error.	Error	Manually perform conversion with GT Designer3 after the conversion.
2006	Log Alarms cannot be converted due to option settings.	Warning	Manually set the unconverted log alarm with GT Designer3 after the conversion.
2007	Maximum character string exceeded.	Warning	Modify the characters using screen editor software before conversion so that the number of characters will be the maximum or less.
2008	Data conversion completed.	OK	---
2009	Data conversion failed.	Error	Correct the error occurred before this error.
2010	No output data.	Warning	No corrective actions are required.
3000	Display data too large.	Error	Before conversion, set the object in a proper position using screen editor software.
3001	The objects not supported.	Error	After the conversion, create a substitute for the error object with GT Designer3. Manually create a substitute object.
3002	Figure (Figure no.) conversion completed.	OK	---
3003	Figure (Figure no.) conversion failed.	Error	Correct the error occurred before this error.
3004	Tag (Tag name) conversion completed.	OK	---

Log code	Message	Conversion result	Corrective action
3005	Tag (Tag name) conversion failed.	Error	Correct the error occurred before this error.
3006	Parts (Parts name) conversion completed.	OK	---
3007	Parts (Parts name) conversion failed.	Error	Correct the error occurred before this error.
4000	Data call from CF card not supported.	Error	Before conversion, change the object setting to other than "CF card" using screen editor software.
4001	Unable to convert indirect devices.	Error	Before conversion, change the warning settings of the object to "direct specification" using the screen editor software.
4002	Indirect color specification is not supported.	Warning	Before conversion, change the color settings of the object to "direct specification" using the screen editor software.
4003	Signed MSB not supported.	Error	Before conversion, change the input code of the object to other than MSB code using the screen editor software.
4004	Unable to convert color blocks.	Error	Before conversion, cancel the color block setting of the object using the screen editor software.
4005	Unable to convert slanted tags.	Error	Before conversion, set the tag angle to 0 degrees using the screen editor software.
4006	Data compressed.	Error	Before conversion, decompress the data using the screen editor software.
4007	Maximum points limit exceeded.	Warning	Before conversion, reduce the number of figures' points to 1,000 or less using the screen editor software.
4008	Data error.	Error	After the conversion, create a substitute for the error object with GT Designer3.
4009	Conversion of text screen number failed.	Warning	Change the total number of lines on the text screen to 12,000 or less.
4010	Maximum line spacing limit exceeded.	Warning	After the conversion, change the position of the character string with GT Designer3.
4011	Unable to convert arrow attributes.	Warning	After the conversion, draw an arrow using lines with GT Designer3.
4012	Unable to convert BMP image in parts.	Error	After the conversion, register the BMP image as a part with GT Designer3.
5000	Syntax error.	Error	Before conversion, correct the script syntax error with the screen editor software.
5001	Unable to convert script trigger.	Error	After the conversion, manually set the trigger with GT Designer3.
5002	Unable to convert script.	Error	Before conversion, remove the command that is not supported by GT Converter2 using the screen editor software.
5003	Unsupported special relay is converted to GD device.	Warning	After the conversion, set the GD device to an appropriate device with GT Designer3.

5.5 Exiting GT Converter2

Exit GT Converter2.

1. Either of the following operations exits GT Converter2.

• Select the [Project] → [Exit] from the menu.

• Click on the title bar.

APPENDICES

Appendix 1 Conversion Specifications for GOT800 Series

This section explains the conversion specifications of project data for the GOT800 series.

> **Point**
>
> • Precautions for data conversion
> GT Converter2 will not be liable for the damage caused by data conversion, from the existing data to GOT2000 series, GOT1000 series, or GOT-A900 series.
> Before downloading converted project data to the GOT, be sure to check GT Designer3 setup and make corrections if necessary.
> Note that any function that is not supported by the conversion destination GOT will not be converted.
> • Converting a file with a name in other than English (Japanese, Chinese or other language)
> The file cannot be converted when the file name is in other than English.
> Change the file name to English before conversion.
> • Converting a file including character strings in other than English (Japanese, Chinese or other language)
> The character strings cannot be converted correctly when the conversion source file includes character strings in other than English.
> Change the character strings to English with the drawing software before conversion.

Even the items described convertible in this Appendix may not be convertible depending on project setup.

If conversion failed in some items, descriptions of the error items are given in conversion log.

☞ Page 34 Checking Conversion Result

Graphics Conversion specification

All graphics convertible.

Conversion specifications for sprites

Restrictions

The following describes the restrictions related to the conversion of sprites.

■Figures that cannot be changed as attributes for display

When converting the lamp display project data or the touch switch project data, the following basic figures are converted as the library project data.

- LAMP 9
- LAMP 10
- LAMP 11
- LAMP 12
- LAMP 22
- SWITCH 34 ON
- SWITCH 34 OFF
- SWITCH 45 ON
- SWITCH 45 OFF

The project data for figures that are converted as the library data cannot change the attributes for display of GT Designer3 ([Frame], [Lamp], [Switch], [Background], and [Pattern]).

To change attributes for display, change [Figure] for the display style to the basic figures.

A

■Conversion specifications

The following indicates the conversion specifications of sprites.

○: Convertible, ×: Inconvertible

Item	Conversion applicability	Remarks
Numeric Value Display	○	------
ASCII Display	○	------
Clock Display	○	------
Comment Display	○	------
System Alarm List Display	○	------
User Alarm List Display	○	------
Parts Display	○	When setting [XOR] for [Display mode], the settings after conversion are shown below. ◇GOT2000 or GOT1000 [While display mode of part display is XOR, grouped figures are displayed by XOR.] is set for [Auxiliary Setting]. ◇GOT-A900 [Enable change of XOR display in part display] is set in the GOT800 Compatible Mode dialog box.
Parts Movement	○	------
Lamp Display	○	------
Panel Meter Display	○	------
Level Display	○	------
Trend Graph Display	○	------
Line Graph Display	○	------
Bar Graph Display	○	------
Touch Key	○	------
Numerical Input	○	------
ASCII Input	○	------
Window display position	○	------
Data List Display	○	------
Alarm History Display	○	------

Appendix 2 Conversion Specifications for GP-PRO/PB Ⅲ Series

This section explains conversion specifications of the GP-PRO/PB Ⅲ series.
(The conversion specifications in this appendix indicate only those of the main items.)

> **Point**
>
> • Precautions for data conversion
> GT Converter2 will not be liable for the damage caused by data conversion, from the existing data to GOT2000 series, GOT1000 series, or GOT-A900 series.
> Before downloading converted project data to the GOT, be sure to check GT Designer3 setup and make corrections if necessary.
> Note that any function that is not supported by the conversion destination GOT will not be converted.
> • Converting a file with a name in other than English (Japanese, Chinese or other language)
> The file cannot be converted when the file name is in other than English.
> Change the file name to English before conversion.
> • Converting a file including character strings in other than English (Japanese, Chinese or other language)
> The character strings cannot be converted correctly when the conversion source file includes character strings in other than English.
> Change the character strings to English with the drawing software before conversion.

The same conversion specifications of GT Converter2 are applied to all versions of the GP-PRO/PB Ⅲ series.
Therefore, all the GP-PRO/PB Ⅲ series versions can be used.
Even the items described convertible in this Appendix may not be convertible depending on project setup.
If conversion failed in some items, descriptions of the error items are given in conversion log.
Page 34 Checking Conversion Result

Conversion specifications of project data

Restrictions of project data

The following describes the restrictions related to project data conversion.
• The setting items related to a memory card are inconvertible.
• When the device has been assigned to the control address of a text table, the device in GOT2000 format or GOT1000 format is converted into a Language Switch device.
The device in GOT-A900 format is inconvertible.
• When "The target base screen of the L tag settings is converted to parts" is selected on Option, the graphic data on the base screen read by the L-tag is converted into parts.
☞ Page 32 Conversion option settings
• Mark screens are inconvertible.
Since parts of GT Designer3 function as same as Mark screen, recreate the Mark screens with GT Designer3 parts after conversion.
• After conversion, parts and figures completely lying off the top or left edge of the display area are displayed as shown below.
◇A part or figure lying off the top edge of the display area is displayed where its Y coordinate is changed to 0.
◇A part or figure lying off the left edge of the display area is displayed where its X coordinate is changed to 0.
Before conversion, check if the parts and figures are outside the display area.
Conversion specifications of GP system setting

■Restrictions

The initial screen number of the initial screen settings is not convertible.

■How to convert screen setup and screen number

To convert screen numbers on GOT, set a script or a ladder program to open the screen having the same number as the initial screen number at a GOT startup.

• Setting example of opening the initial screen (screen No. 2) at a GOT startup using a script

GT Designer3 setting

◇Base screen switch device   GD100

Script setting example

| Item	Description	
Data range	Unsigned BIN16	
Trigger type	Rise	
Trigger device	GS0.b4	
Script	[w:GD100] = 2;	//Writes screen No. 2 of initial screen //to base screen switching device.

• Program example for opening the initial screen (screen No. 2) at a GOT startup using a ladder program

GT Designer3 setting

◇Base screen switching device   D100

◇System signal 2-1   D300

Program example

Writes screen No. 2 of initial screen to base screen switch device on rising edge of GOT ready bit (bit 1 of system signal 2-1).
Conversion specifications of alarm data

■Restrictions

The following describes the restrictions related to alarm data conversion.

• In the Bit Log Alarm setting and Word Log Alarm setting, only the log alarm selected for conversion is converted.

☞ Page 32 Conversion option settings

• The background color of a text is not converted.

After conversion, the text appears without background color.

• Comment numbers are not shifted up at the time of conversion.

The positions having no numbers before conversion have no numbers after conversion.

■Conversion specifications of alarm data

The following indicates the conversion specifications of alarm data.

Alarm data item	Conversion applicability	Conversion destination[*1]	Remarks
Alarm Message	○	◇GOT2000 Comment Group, Alarm Popup Display ◇GOT1000 Basic Comment, Comment Group/Advanced Alarm Popup Display	Refer to the following for the conversion destination comment No. ☞ Page 48 Basic comment and comment group conversion
Alarm Summary setting	○	◇GOT2000 Comment Group, Alarm Popup Display ◇GOT1000 Basic Comment, Comment Group	
Bit Log Alarm setting	○	◇GOT2000 Comment Group, User Alarm Observation ◇GOT1000 Basic Comment/Common Settings (Alarm History)	
Word Log Alarm setting	○	Basic Comment/Common Settings (Alarm History)	

*1   Advanced Alarm Popup Display and Comment Group are convertible for GOT1000 series only.

Conversion specifications of filing setting

■Restrictions
Setting items related to a memory card are inconvertible.

Conversion specifications of text tables

■Restrictions
The following describes the restrictions related to text table conversion.
- When text tables are converted into GOT2000 format or GOT1000 format, the text tables No. 1 to 10 will be converted into basic comment and comment group, and text tables No. 11 and later will not be converted.
- When using Language Switch, convert a text table into GOT2000 format or GOT1000 format, and change the object whose text will be displayed on GT Designer3 into an object compatible with Language Switch, for example, Comment Display, Advanced User Alarm, Advanced System Alarm.

Language Switch cannot be executed without correcting the objects.
- When a text table is converted into GOT-A900 format, Language Switch will be disabled.

Refer to the above (b) for detail.
- When text tables are converted into GOT-A900 format, only the text table No. 1 is converted into the basic comment, and the text tables No. 2 and later will not converted.
- Up to 512 characters of each text string in a text table will be converted and the 513th characters and later will be deleted.
- The background color of a text will not be converted.

After conversion, the text appears without background color.
- Comment numbers will not shifted up at the time of conversion.

The positions having no numbers before conversion turns to as they are after conversion.

■Conversion specifications of text tables
The following indicates the conversion specifications of text tables.

○: Convertible, ×: Inconvertible

Text table item	Conversion applicability	Conversion destination	Remarks
Text table setting	○	Basic Comment and Comment Group	Refer to the following for the conversion destination comment No. ☞ Page 48 Basic comment and comment group conversion

Conversion specifications of screen types

■Restrictions
The following describes the restrictions related to screen type conversion.
- Up to 12767 lines of strings on text screens are converted in order of screen numbers.

The 12768th lines and later will not be converted.
- The background color of a text on a text screen is inconvertible.

After conversion, the text appears without background color.
- On a text screen, one line is converted as one comment.
- Comment numbers on a text screen will not be shifted up at the time of conversion.
- Text screens with multi-language setting are not converted.

After conversion, set them as basic comments or comment groups on the GT Designer3.
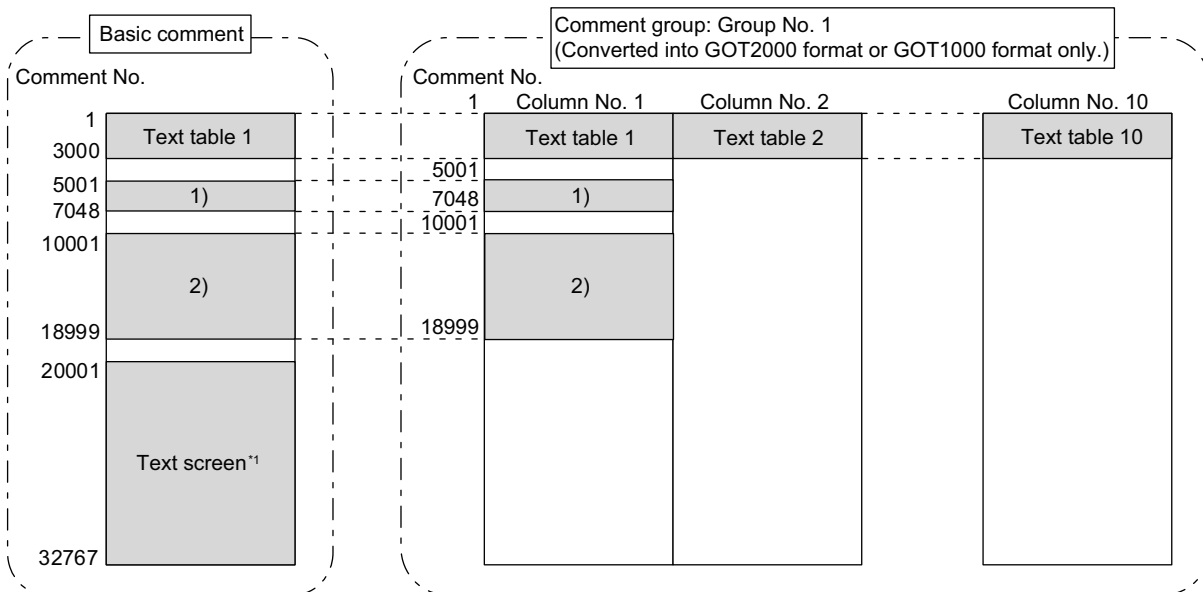

A

■Conversion specifications of screen types

The following indicates the conversion specifications of screen types.

○: Convertible, ×: Inconvertible

Screen information item	Conversion applicability	Conversion destination	Remarks
Base screen	○	Base screen and parts	The conversion destination changes, depending on the setting on the Conversion setting screen. ☞ Page 32 Conversion option settings Base screen No. : 1 to 8999 Parts No. : 1 to 8999
Mark screen	×	------	Mark screens are inconvertible. Since parts of GT Designer3 function as same as Mark screen, recreate the Mark screens with GT Designer3 parts after conversion.
Trend Graph screen	○	Window screen	Window screen No.: 20001 to 28999
Keyboard screen	○	Window screen	Window screen No.: 10001 to 18999
Text screen	○	Basic comment	Refer to the following for the conversion destination comment No. ☞ Page 48 Basic comment and comment group conversion
Image Library screen	○	Parts	Parts No.: 10001 to 18999
Video screen	×	------	------
Window screen	○	Window screen	Window screen No.: 1 to 8999

■Basic comment and comment group conversion

The following shows the structure of alarm data, basic comment and comment group after converting from text table and text screen.

1) Bit/Word Log Alarm setting
2) Alarm Message Display/Alarm Summary setting
*1 The comment numbers of text screen will be shifted up at the time of conversion.

Refer to the following for the restrictions.

Text table

☞ Page 47 Conversion specifications of text tables

Bit/Word Log Alarm setting

☞ Page 46 Conversion specifications of alarm data

Alarm Message Display/Alarm Summary setting

☞ Page 46 Conversion specifications of alarm data

Text screen

☞ Page 47 Conversion specifications of screen types

GP type

Screen information

Restrictions

The following describes the restrictions related to screen information conversion.

• Mark screens are inconvertible.

Since parts of GT Designer3 function as same as Mark screen, recreate the Mark screens with GT Designer3 parts after conversion.

• When Base screens are converted into parts by the setting on the Conversion setting screen, only graphic data is converted into parts.

• When Image Library screens are converted, only graphic data is converted into parts.

A

Graphic data

Restrictions

The following describes the restrictions related to graphic data conversion.

- Blink settings are inconvertible.
- The graphic data that extends off the screen edge is inconvertible.
- Setup items, which have not been converted, are replaced by default settings of GT Designer3.

Conversion specifications

The following indicates the conversion specifications of graphic data.

When any inconvertible items are included in project data, only convertible items are converted.

○: Convertible, ×: Inconvertible

Graphic data item	Conversion applicability	Conversion destination	Remarks
Dot	○	Rectangle	------
Line / Poly-line	○	Line / Line Freeform	Arrows are converted to lines.
Rectangle	○	Rectangle / Polygon	Rounded rectangles and chamfered rectangles can be converted into those available for GOT2000 series or GOT1000 series only. For converting rectangles into data available for GOT-A900 series, chamfered rectangles are converted into polygons.
Circle / Oval	○	Circle	------
Arc / Pie	○	Arc / Sector	------
Fill	○	Paint	------
Filled Polygon	○	Polygon	------
Tick mark	○	Scale	Arc scales are inconvertible. Linear scales are convertible.
String	○	Text / Simple Comment	For converting strings to GOT2000 format or GOT1000 format, if the conversion source applies to the conditions below, the strings are converted to Simple Comment. If the conversion source does not apply to the conditions below, the strings are converted to text figures. ◇String table reference ◇Horizontal writing ◇No slant
Load Screen	○	Set Overlay Screen	When the screen to be read is an image screen, it is converted into parts display (display condition: GB40 Rising).
Load Mark	×	------	Mark calls are inconvertible as well as Mark screens.

Tag information

Restrictions

The following describes the restrictions related to tag information conversion.

- Display angle is always converted to 0 degree.
- The tag information that extends off the screen edge is inconvertible.
- Indirect color setting will be converted to white.
- When an input code, which is not supported by the GOT (example: MSB code) is included, the tag information will not be converted.
- When the input/display range of a relative display is indirect, it is converted into an object in which data operation has not been set.
- When Color change has been set Alarm tag, the tag will be converted without alarm action.
- Zero display settings are inconvertible.

On the GOT, data 0 is shown as "0" on a screen.

- When Indirect offset devices are set to operation data have been , the operation data will be converted without operation processing.

- When Indirect offset devices are set to range values of Alarm/Range, the range values will be converted without Alarm/Range.
- Q-tags will be converted into alarm history.
- It is not converted into an extended alarm history.
- Level-by-level color switch display of Q tags are inconvertible.

Conversion specifications

The following indicates the conversion specifications of tag information.

When any inconvertible item is included in project data, only convertible items will be converted.

Tag information item	Conversion applicability	Conversion destination	Remarks
A-tag (Alarm Summary Text Display)	○	◇GOT2000 format Simple Alarm Display ◇GOT1000 format Alarm list	------
a-tag (Alarm Summary Display)	○	◇GOT2000 format Simple Alarm Display ◇GOT1000 format Alarm list	------
C-tag (Time Display)	○	Clock Display	------
D-tag (Statistical Graph Display)	○	Statistics Graph	------
d-tag (Statistical Data Display)	×	------	------
E-tag (Extended N-tag Function)	○	Numerical Display	------
F-tag (Free Library Display)	×	------	------
G-tag (Graph Display)[*1]	○	Level/Panelmeter	------
g-tag (Extended G-tag Function)[*1]	○	Level/Panelmeter	------
H-tag (Moving Mark Display)	×	------	------
J-tag (Moving Mark Display)	×	------	J-tag is inconvertible as well as Mark screen.
K-tag (Setting Input)[*2]	○	◇GOT2000 format Numerical Input, Character String Input ◇GOT1000 format Numerical/ASCII Input	Not converted when indirect setting is "Device type & address".
k-tag (Key Input)	○	Key code switch	------
L-tag (Library display)	○	Parts Display	------
I-tag (Library Status Display)	○	Parts Display	------
M-tag (Mark Display)	○	------	------
N-tag (Numeric Display)	○	Numerical Display	------
n-tag (Alarm Range Display)	×	------	------
P-tag (Numeric Display in Pre-designed Format)	○	Numerical Display	Can be converted to GOT1000 format only. Cannot be converted to GOT-A900 format.
Q-tag (Alarm Summary Display)	○	◇GOT2000 format Alarm Display (User) ◇GOT1000 format Alarm history	------
R-tag (Rail Settings)	×	------	------
S-tag (String Display)	○	◇GOT2000 format Character String Display ◇GOT1000 format ASCII Display	
T-tag (Touch Panel Input)	○	Bit/Word/Key code switch	Not converted when group is specified for action setting. For the conversion specifications of action settings set for Mode/Special, refer to the following. ☞ Page 54 Conversion specifications of action settings set for Mode/Special of T-tag
t-tag (Selector Switch Input)	×	------	------
Tih-tag (Inching Function)	×	------	------
Tiw-tag (Inching Function)	×	------	------
U-tag (Window Display)	×	------	------

A

Tag information item	Conversion applicability	Conversion destination	Remarks
V-tag (Video Window Display)	×	------	------
v-tag (Extended Video Window Display)	×	------	------
W-tag (Write to Device)	○	Status Observation: Screen	Not converted when action setting is bit inversion.
X-tag (Display Text Data)[*3]	○	Comment Display	------
Trend Graph Display: Designated Screen	○	Trend Graph	------
Trend Graph Display: Channel Setting	○	Trend Graph	------

*1   When the relative setting is specified for G-tag and g-tag, the maximum and minmum values in the input range are converted into the upper and lower limits.

*2   Data in the alarm range set for K-tag are converted into data in the display range of the numerical input. Data outside the alarm range are converted into data in the input range of the numerical input.

*3   When a word address of the display start line is set for X-tag, the address is converted into data of a monitor device.

Conversion specifications of action settings set for Mode/Special of T-tag

The following describes the conversion specifications of action settings set for Mode/Special of T-tag.

When any action setting other than those in the following table is set, the T-tag will not be converted.

Action setting of T-tag	Action setting of key code switch
Up	Move cursor upward
Down	Move cursor downward
OK	Write to the device and move the cursor
Start	Show cursor
Start (Freeze Mode)	Show cursor
Finish	Hide cursor
Ack	Display date/time of selected data
Ack All	Display date/time of all data
Roll Up	Scroll up by one line
Roll Down	Scroll down by one line
Delete	Clear the selected alarm data
Delete All	Clear all alarm data
Clear Recovered Alarm	Clear the selected alarm data
Clear All Recovered Alarms	Clear all alarm data
Back to previous screen	Move to upper-hierarchy

Parts information

Restrictions

The following describes the restrictions related to parts information conversion.

- Parts information comments are inconvertible.
- Change notification bit setting function of the setting value display function is inconvertible.
- Grouping function of setting value display function is inconvertible.
- Graphic data included in the parts will be converted into graphics.
- Name plate characters of switch, lamp and message display are converted as name plate of conversion destination object.(Display position is center.)

Conversion specifications

The following indicates the conversion specifications of parts information.

When any inconvertible items are included in project data, only convertible items are converted.

Parts information item	Conversion applicability	Conversion destination	Remarks
Bit switch[*3]	○	Bit switch	------
Word switch[*3]	○	Data set switch	------

Parts information item	Conversion applicability	Conversion destination	Remarks
Special function switch[*3]	○	Key code switch	------
Toggle switch[*3]	○	Bit switch	------
Lamp[*3]	○	Lamp display	------
4-State Lamp	○	Word Lamp display	------
Bar Graph[*1]	○	Bar Graph	------
Pie Graph[*1]	○	Panelmeter	------
Half Pie Graph[*1]	○	Panelmeter	------
Tank Graph[*1]	○	Level display	------
Meter Graph[*1]	○	Panelmeter	------
Trend Graph	○	Trend Graph	------
Keyboard	○	Key code switch	------
Keypad Input Display[*2]	○	◇GOT2000 format Numerical Input, Character String Input ◇GOT1000 format Numerical/ASCII Input	------
Alarm	○	User alarm	------
File Name Display	×	------	------
Logging Display Device	○	Logging	------
Data Transfer Display	×	------	------
CSV Display	×	------	------
File Manager Display	×	------	------
Numeric Display	○	Numerical Display	------
Message Display[*3]	○	Lamp display	------
Date Display	○	Date display	------
Time Display	○	Time Display	------
Graphic display	×	------	------
Window Display	×	------	------

*1 When the relative setting is specified for bar graphs, pie graphs, half pie graphs, tank graphs, and meter graphs, the maximum and minmum values in the input range are converted into the upper and lower limits.

*2 Data in the alarm range set for the keypad input display are converted into data in the display range of the numerical input. Data outside the alarm range are converted into data in the input range of the numerical input.

*3 When a name plate which is referring to a text table is converted to GOT2000 format or GOT1000 format, the name plate is converted to a Comment Group name plate.

A

D-Script

Restrictions

The following describes the restrictions related to D-Script conversion.

- When a script includes any inconvertible items other than a trigger, that script will not be converted.
- Trigger expressions, "Detect true (nonzero)" and "Detect false (zero)" will be converted to [Ordinary] of trigger type.

Point

- How to convert functions similar to expressions, true (nonzero) and false (zero)

The script to which the following control statement is added to the head part after being converted to GT Designer3 can be executed under the same condition as D-Script.

◇When "Detect true (nonzero)" is used in D-Script

if(!<Condition>[*1]){ return; }

*1 The above <Condition> is an expression that is considered to be true at the trigger conditions of "Detect true (nonzero)"

◇When "Detect false (zero)" is used in D-Script

if(<Condition>[*2]){ return; }

*2 The above <Condition> is an expression that is considered to be true at the trigger conditions of "Detect false (zero)"

Conversion specifications of script settings

The following indicates the conversion specifications of script settings.

○: Convertible, ×: Inconvertible

Script setting item		Conversion applicability	Conversion destination	Remarks
ID		×	------	------
Comment		×	------	------
Trigger	Timer, Rise, Fall, Change	○	Trigger type	------
	Condition	○	Trigger type (Ordinary)	By editing the script on GT Designer3 after conversion, similar functions can be reproduced. ☞ Page 56 Restrictions
Timer setting (1 to 32767)		○	Sampling	------
Bit address		○	Trigger device	------
Trigger		×	------	------
Execution		○	Script file	------
Data range (BIN/BCD)		○	Data format (BIN/BCD/real number)	------
Bit length (16/32)		○	Data format (16/32)	------
Code +/- (Present/Absent)		○	Display data format (Present/Absent)	------

Conversion specifications of variables

The following indicates the conversion specifications of variables.

○: Convertible, ×: Inconvertible

Variable	Conversion applicability	Conversion destination	Remarks
Dec (Decimal)	○	------	------
Hex (Hexadecimal)	○	------	------
Oct (Octal)	○	------	------

Conversion specifications of addresses

break	○	break;	------

Conversion specifications of functions

A function is developed in the location where it was called.
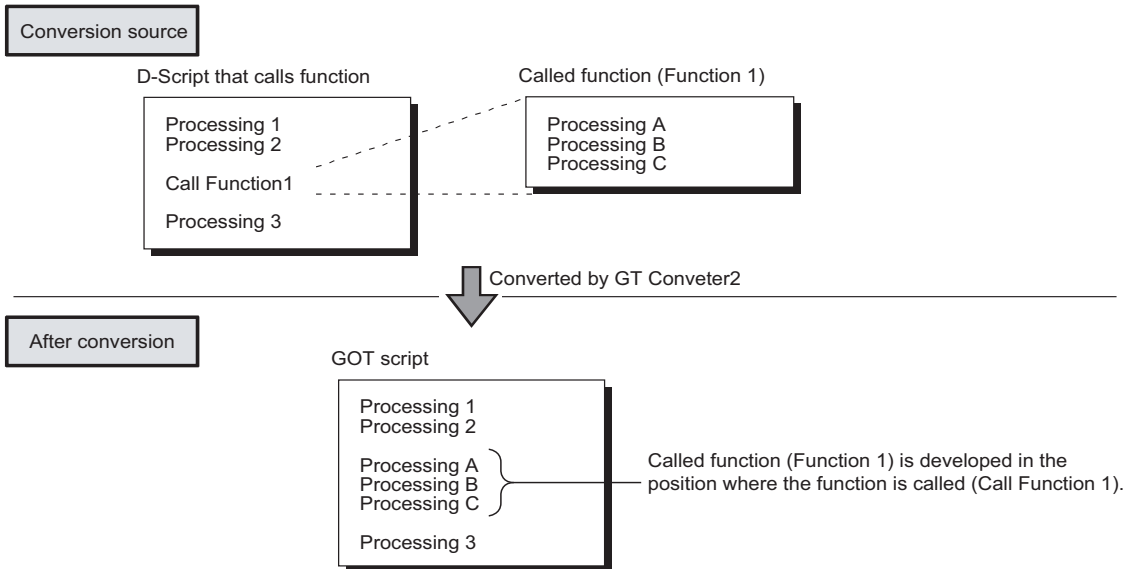

LS area

The following describes the conversion specifications of LS areas.

Restrictions

The following describes the restrictions related to LS area conversion.

- Devices from LS0 to LS2031 and LS2096 to LS8191 will be converted into GOT data registers GD of the same device numbers as the LS area addresses.

For example, LS4000 is converted to GD4000.

Since the function of LS area will not be replaced by the GOT data register GD, that is user area, reallocate the devices with GT Designer3 if necessary.

- When any of devices from LS0 to LS63 is converted into GOT-A900 format, reallocate the device with GT Designer3 since those devices cannot be used.
- Since devices from LS0 to LS19, system data area, are converted into GOT data registers GD, that is user area, the functions become unavailable after conversion.

Conversion specifications of LS areas

The following indicates the conversion specifications of LS areas.

The LS area described in the D script is also converted like the LS area set to the object.

Conversion source LS area	Conversion destination device	Description	Remarks
LS0 to LS2031	GD0 to GD2031	Internal device	Converted into device having the same number as the LS area address.
